Press Release 11/4/22

1. Florence Township Water and Sewer routinely monitors for the presence of federal and state regulated drinking water contaminants. New Jersey adopted a standard, or MCL, for PFOA in 2020 and monitoring began in 2021. The MCL for PFOA is 0.014 parts per billion (ppb) and is based on a running annual average (RAA), in which the four most recent quarters of monitoring data are averaged. On September 13, 2022, we received notice that the sample collected on August 24, 2022 showed that our system exceeds the PFOA levels. The RAA for PFOA based on samples collected over the last four quarters to be 0.015 ppb. After receiving notice, Florence Township immediately began testing our wells to locate the cause of the elevated PFOA results. We have identified the wells with the higher levels and will be taking them offline until corrective action is taken. Florence Township will consult with our water engineer to develop a corrective action plan. The wells that have been tested and are in compliance will continue to provide the main source of our drinking water. We will continue to test the wells to ensure the safety of our residents. We anticipate resolving the problem by October 2023. For more information, please contact David Lebak at (609)-499-2518.

2. Burlington County is advancing new transportation improvements to reduce congestion and guide truck traffic away from residential neighborhoods in Florence and Burlington Township.

The Burlington County Commissioners voted Wednesday to authorize contracts with CME Associates, McMahon Associates and Colliers Engineering for design, engineering and construction administration services related to improvements planned for Daniels Way and John Galt Way in Florence, and Neck Road and Dulty's Lane in Burlington Township.

The specific improvements include:

- Extending Daniels Way from John Galt Way in Florence about a mile west to River Road (County Route 656);
- Adding a modern roundabout at the intersection of Daniels Way and John Galt Way;
- Adding a modern roundabout at the intersection of Neck Road and Dulty's Lane.

The extension of Daniels Way and the two planned roundabouts at the intersections of Daniels Way/John Galt Way and Dulty's Lane/Neck Road will help guide trucks to Route 130 via Dulty's Lane and John Galt Way and away from residential neighborhoods off Neck Road and Front Street and Delaware Avenue (County Route 656) in Florence. The roundabouts will also process traffic at those intersections without the need for signalized intersections.

The improvements are expected to be paid for primarily with federal or state grants and funding from impact fees assessed on developers by the county and affected municipalities for off-site transportation improvements. Upon completion, Burlington County plans to take responsibility for Daniels Way and Florence Township will assume responsibility of Front Street.

3. Beginning on or about Monday, October 10, 2022, PSE&G crews and approved contractors, began upgrading and replacing utility poles and electric wire along the following streets:

11. **Water Service Lines Letters: In July 2021, P.L.2021, Ch.183 (Law) was enacted, requiring all community water systems to replace lead service lines in their service area within 10 years. Under the law, Florence Township is required to notify customers, non-paying consumers, and any off-site owner of a property (e.g., landlord) when it is known or unknown, if they are served by a lead service line. A letter was sent out on 9/1/22 to those residents this new law may affect. Note that per C.58:12A-41, section 2, the definition of a lead service line now includes lead connectors (lead gooseneck, lead pigtail, or other lead fitting) and galvanized service lines. Our service line inventory is available at www.florence-nj.gov. A service line is a portion of pipe that connects the water main to the building inlet. In Florence Township, the service line is owned entirely by the property owner. The service line materials are [lead/galvanized/unknown]. Florence Township is developing a lead service line replacement program. If you are planning to replace your lead service line, contact us at (609) 499-2518 prior to replacement so that we can coordinate our efforts.**
